

Hello everybody !

On the photo you can see my school careers (my education). As it is written, I was registered at school for the first time when I was 2,5 years old. Then, when I was 7, I went to a primary school. I always had good points and I always wanted to be a teacher. After the primary school, there is the secondary school. I choose Latin and modern languages option. You are certainly wondering why I choose this option, its s because I like languages and especially the Romans and Greeks' old histories. Unfortunately, for the first time, I had a difficulty when I was in 5th year secondary. I had 49,2 in English. The results of the other subjects were very good. It means that I miss 0,8 points so less than 1 ! So what happens? I failed my class. That year I hated school and I did not want to study no more. Finally, I did my 5th year in the same school. But in 6th, I had anew the same teacher and I did not want to risk another time with him. It is why I changed school. In 2011, I enrolled at HUB to become a teacher and to realize my childhood dream. My internship is going very well. I also receive a proposal to begin on September as a teacher in the school of my internship. In a few months, I will start with my own students as a real teacher!
