

School Experiences Conceptualized and Compared: Your journey up the educational ladder

We are climbing up the same educational ladder, described by UNICEF:

Level 0 – pre-primary

Level 1 – primary

Level 2- Lower secondary

Level 3 – Upper secondary

Level 4 - Vocational courses etc. on secondary level. 2.

Level 5 – Bachelor / Master

Level 6 – Ph.d.

Every person has a personal story of experiences and own tours and detours, for example wonderful teachers, difficult decisions, like dropping out high school, travelling and getting back on track. Which kind of milestones did you experience on your way to Teacher Education?

The Task:

Deadline: March 3rd

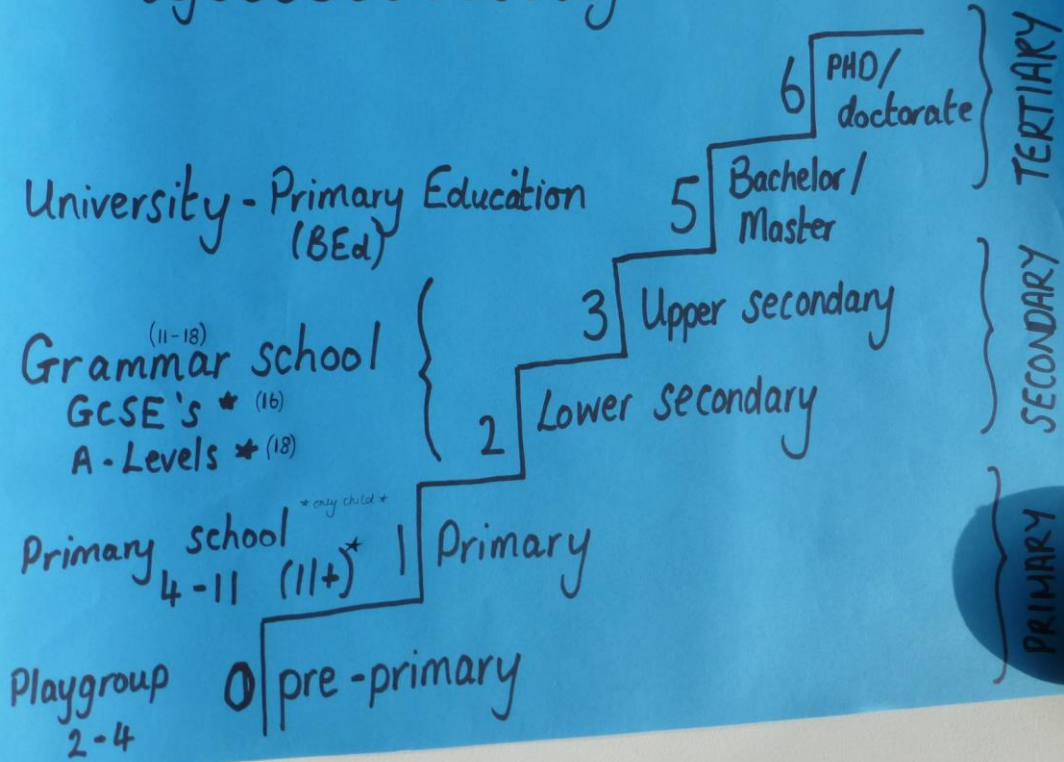

A. Make a poster:

1. Copy the stairs of the educational ladder. (See photo)
2. Show your own route up this ladder (use the terms of the different steps **in your own language**, visualize also shift from one school to another and periods of work etc. See more examples on enclosed photos.
3. Consider educational experiences, you have had along the way, that have had a profound effect on you. E.g. experiences that made you decide to become a teacher or gave you an understanding of how not to teach. Choose one of those experiences to tell your fellow students, and place a star at your poster at the step where this experience took place.

B. Explain your tour up the educational stairs and tell your chosen experience to your fellow students:

1. Take a picture of your poster. Upload the picture and write or voicerecord your chosen experience.
2. Please upload picture and text /recording to Podio and share it with your fellow students.
3. Bring the physical poster to Izmir; we will organize an exhibition with your posters
